---

## FoxyPreviewer Torrent

FoxyPreviewer is a third-party specialized software solution that was designed in order to help advanced computer users such as programmers or developers export their Visual FoxPro reports to image files and RTF, PDF, HTML or XLS formats as well without significant efforts by adding a class to the host application. The utility behind this VFP report generating class is that users can efficiently send their reports via email with one another and even enhance the looks of their previews, making them more appealing and accessible by enabling users to decide how stylish their reports are going to be. Among the features that FoxyPreviewer brings to the common user you can find a preview toolbar that brings some modifications to the original one, so that you can have a clear view of your projects before exporting them to different formats. Other features include a printers combo menu that let you view all the available printers, a copies spinner button, a miniatures button to view thumbnails of all the pages, a "Save as" button that lets you export your report to many different formats on your computer, a context menu that can perform various operations and a "Send email" window for rapidly sharing your reports. FoxyPreviewer Features: Export reports to PDF, RTF, HTML, XLS, JPG, TIFF, PNG, BMP, GIF, PDF, DOC, DOCX, PPT, and others. Click your folder and add reports to show all documents. Preview all the reports in a folder as a group. Preview reports in a folder in a ZIP or TAR archive. Preview all the reports or only specified reports. Preview all the reports from the applications: Word Excel Powerpoint Outlook Access Aspose.Pdf Summary
