Windows Embedded Pocket PC Autodesk has developed AutoCAD and AutoCAD LT Pocket PC application that runs on Windows CE-based handheld computers running Windows Embedded operating system with PocketPC 2003 and PocketPC 2005 operating systems as it has been released for Pocket PC 2003 and Windows Mobile Pocket PC 2005. In addition, it has been released for Windows Mobile Pocket PC 2006. The applications run on ARM-based processors and support pen or stylus input. The user interface on the handheld devices are set to the same user interface as the full version of AutoCAD and AutoCAD LT. Third-party applications

The following AutoCAD-based applications have been developed using AutoLISP, Visual LISP, or some other proprietary languages that use the same syntax as AutoLISP or Visual LISP.

**MSX AutoCAD/ML**  
AutoCAD/ML – AutoCADML – This AutoLISP-based application was developed to save paper and developers time. Its primary purpose was to produce form files (Architecture) for Microsoft XLS files. The application enables the user to insert drop lists from MSX AutoCAD into a Microsoft XLS spreadsheet. It generates the text and formatting information from the fields in the drop lists.

**Callisoft Architect** – Callisoft Architect is a tool for architectural drafting. It has a user interface that resembles the native version of AutoCAD. It is compatible with AutoCAD LT and AutoCAD only. The Express version of the program is free.

**Autodesk Design Review (AutoCAD Edition)** – Provides a user interface that resembles the native version of AutoCAD and is also compatible with AutoCAD LT and AutoCAD only.

**Graphis family** Graphis (now part of Autodesk) was first created in 1983. It was an early graphics package for AutoCAD. It provided both an X and Y-Axis design-space. It was a 2D library-based package and could be developed in LISP. Graphis/Xpress was one of the first tools to
