Galactic Frontier is a game where you start as a small time adventurer who wants to make a name for yourself. At the beginning of the game you have a space truck available to you in which you can carry cargo and passengers back and forth between star systems. You are a merc who gets by on your wits, with a handful of upgraded systems and a relentless drive to succeed. You will have to compete against bigger, badder and better ships. Upgrades! You can get upgrades for your ship and your weapons. All upgrades can be purchased at Mule Mines. Spacing! You need to be able to scout out the systems that can be profitable for you. Although, some systems will be out of your reach. The Frontier! You will be surrounded by a web of systems, all of which share a common border. Space is lawless. Being near a system means you are near it. Being near another systems means you are near, well, nothing and will be attacked. Play style: The scoring system is very simple. Points are gained by shooting a laser at another ship. It's a purely competitive game where the focus lies on a small group of players. If you're a competitive player, playing regularly, and have a lot of time to invest, then Galactic Frontier is for you. Notes Galactic Frontier is still in Alpha. It is in development for PC, Mac and Linux platforms. By all accounts the Occupy Wall Street protestors have been pretty good: They've been peaceful and organized, they've raised some important issues in interviews, they've inspired a lot of municipal governments to change the way they think about traffic, and, most importantly, they've been innovative. Like finding an idea for a new form of protest: Fix The Web, an idea that involves "shielding" their first amendment rights by transforming Gmail into internet proxy: The idea of Fix the Web grew out of frustration with the Internet and a desire for privacy online. So the group created an app called Fix the Web. It's a tool that allows anyone to cloak their Gmail, Facebook, Twitter, and other email and social media accounts from third-party inspection and thereby protect their identity online. It is meant to be a fun and simple solution to a serious problem. The group received an award at the One New York (formerly Burning Man) Media Arts Festival last weekend for "Delivering Imagination to the World." What did they say? Then they would have been in even more trouble than they were

Embark on a fire-themed adventure as the legendary character, Bomberman, in 3D.Ligand field spectroscopy of mononuclear ruthenium(II)-chalcogenide (chalc = S and Se) complexes. The optical spectroscopy of the bonding of ruthenium to chalcogenide ligands has been investigated. The use of organosulfur and organoselenium compounds as ligands has been explored. For both chalcogens, the stretching vibrations at about 420 cm⁻¹ do not correspond to the metal-ligand force constant. This observation is not unusual for the strongly bound ligands. The interpretation of the electronic origin of this band is discussed, and evidence is obtained from density functional calculations. The downshift of the bands of the chalcogens is interpreted in the light of the respective valence state. The upshifts of the higher lying bands by about 100 cm⁻¹ are discussed in terms of their origin c9d1549cdd

What's new in Mayan Prophecies: Ship Of Spirits Collector's Edition:

Britain By Stephen Fry Stephen Fry: On Being British by Allister Heath Ahead of the DVD release of the life story of the dashing wit and self-made multimillionaire Stephen Fry, I asked British comedy legend that he would share some insight into his writing. How would he sum up what it has been like to be a famous British writer for so long? What do you think Stephen Fry is most proud of? Allister Heath: Without being impertinent, he is always unabashedly proud of saying exactly what's in his head. He has cultivated the status of folk you can phone up and say, 'I want to come and see you,' and he's done that almost since he was a teenager. I call him a proud British writer: I think he is proudest of being the first real Briton to have such a fully-fledged writing career. He has written films, had a whole new career, written and acted in comic sketches, produced shows in the West End, done some of the best monologues, been asked to dress up as a gorilla in a sketch, and more besides. By the way, the gorilla guy was me - I'd thought I'd find it a good sketch, and it had enormous publicity. Stephen loves publicity, generally for the wrong reasons. My first introduction to Fry was in the days when he wrote and presented a TV series called The Old Actors' and Actresses' Theatre Round Table. By that age I had only just heard of the word comedy; all I knew was this voice-man, who wasn't funny. So I was astonished when he started talking to me about playing comedy. He played by the rules, politely; he didn't seem to be a terror of authority in any way. His main point was that I had to play the game and should work with a house. I later saw him on the monologues page of The New Statesman, and within weeks I'd seen his shows at the Edinburgh Fringe and on TV; and I found out why he was talking to me. How did he handle the feeling of 'success' after You'll Never Get Rich? Quite a coup. That was the big one, and he won the best TV drama award. There was a small company show about the Turner prize. His producer asked if he'd
