The objective of this study was to determine the effect of a low C-reactive protein (CRP) serum concentration as a prognostic indicator in patients undergoing antimicrobial therapy and drainage of complex wounds. We conducted a prospective study of 230 patients. Patients with complicated skin and soft tissue infection (cSSTI) who were treated with an antimicrobial therapy and drainage of complex wounds were included. The primary outcome of the study was wound healing in a defined time period. Secondary outcomes were wound complications and relapse. Patients were divided into two groups according to their baseline serum CRP concentration: high CRP (≥ 35 mg/L) and low CRP (≤ 20 mg/L). Of the 230 patients included, 65.7% (152/230) had high CRP levels. The mean follow-up time was 42.5 ± 27.1 days. Rating: 10/10 "The good play must be chosen, for it is the good play that makes the difference; the good play is deep as your own heart; for your heart is wise, the good play is simple; the good play is all there is." -Daguz Seer "A fantasy game with lasting appeal over 10+ years after its release is both a rare and impressive feat. Fans of other ARPGs, regardless of their particular gaming preferences, will find great enjoyment in the Tarnished world and will want to play the game for quite a while." -CheatCodeGuides Gamasutra reviews Tarnished, an upcoming fantasy ARPG from Amanita Design. "The graphics are absolutely beautiful. The details are amazing, and even in fights it's a pleasure to look down and see your enemies cleaving their way through the fog of war. The voice acting is top-notch as well, with each character offering a memorable, if minor, impression. Not only is it a beautifully designed game, it's also a smart, well-crafted game, which means that there are mysteries and secrets to uncover in this world. There are a lot of them. The combat is fun. The combination of weapons, armor, and skills are many, creating a wide array of unique playing styles. Right from the start you'll find yourself learning what's best and choosing what to use each time you play. The smoothness of the action makes the fights feel fresh and invigorating. It's easy to get caught in the feels and just go crazy when a skill lands, so it's important to stay light on your feet and ready to move before the opportunity passes you by. That said, the combat is forgiving enough that it's never difficult to recover from mistakes, and it's the spontaneous that matter the most. The most popular topic of conversation surrounding Tarnished is Amanita Design's decision to avoid an "endgame" for the game. The developers want players to feel like they've accomplished a goal and come up with their own finish line, letting them pick what works for them. With this, the developers have made a living, living world. Alongside the well-developed roleplay for those who are into that, there bff6bb2d33
