"Sword Art Online" was originally released in 2011 as a novel written by Reki Kawahara. In the year after its release, the game, which was based on Reki Kawahara's original novel, was adapted into a manga series by the same name. The manga, which was illustrated by Kawahara, was also published between April 2011 and October 2012. In 2012, the anime adaptation of the game was released in Japan. It has since attracted a vast fanbase. In 2015, the "Sword Art Online: Hollow Fragment" anime was released. The original Reki Kawahara novel is being adapted as a manga series and an anime series. In 2017, a strategy game based on the world of "Sword Art Online" and the anime adaptation was released in Japan. In addition, an animated short that shows how Alice got stronger was aired at the end of 2017. There is a strong emphasis placed on realism in the game. During the planning and production phases, there were around 10 people, including Kawahara, who were responsible for planning the scenes. After the planning was complete, each member of the development team created scripts based on the scenes as they were planned, and then worked together with the other members to create the game. However, it was made clear from the beginning that this game was not intended to be realistic, as there was no need to be super-realistic in a fantasy game. "Sword Art Online: Hollow Fragment" utilizes the original "Sword Art Online" video game engine. It is a single-player game. While it is technically possible to play

Southeast Asia Developer Publisher Platforms Game Website Review Indonesia PAX PHASE

---

1, PAX PHASE 2, PAX PHASE 3 N/A Publisher Developer Website Store Here is the final entry in the PAX PHASE series, this time revolving around the Void God Game. Not a new entry, but a continuation of the first PAX series. With a theme that of healing and restoring, the gameplay should this time revolve around the Void God healing you and your allies. Probably a nice turn of events, though I'd rather that they have turned it into a fun spin-off where the user has to create its own ultimate lord. Here's the basic info

Objective : Play as a character created by you in a fantasy world, in an online RPG that lets you define your style. Your goal is to defeat the enemy by collecting items (weapons, armor, ingredients, and so on), while gaining experience points. Character Creation : Character customization : Weapon, Armor, and Hair color, as well as gender. Multiplayer : Player versus player battles. Map : Two dimensional terrain. Stat : Experience and Fighting Points, the latter of which can be used in skills. Battle : Command spells (all to use in the game) that involve attack, defense, attack ability, and target selection. Building : You can build buildings such as mines, factories, alchemy labs, etc., as well as, huts, etc. You can also plant trees to get food and experience. Items : Anything that you find in the world can be made into items. There's a lot of potential here, and it would be great if they could make something a little better. It's not that I don't like the game, I just feel like they'd get better use out of it if they did it right, instead of putting it out there and hoping everyone is happy with it. Right now, I'm not really happy with it. It could use a bit more variation, and the music just isn't very inspiring. Gameplay : It's an RPG. There's a lot of customization. There's six characters, and nine races to choose from, all of which have their own unique "path of power" that evolves, as well as its class. The classes are that of the Fighters, Mages, Necromancers, Healers, Paladins, bff6bb2d33
